ALPS Flex Sleeve

ALPS New Flex Sleeve (SFX) is a new seamless knitted construction. It features ALPS HD Gel which has a relatively firm nature and provides maximum comfort while providing a great degree of control. The SFX has a 30° pre-flexion which allows for ease of bending and reduces bunching behind the knee.

Motion E2 Elbow from Motion Control

Motion Control, a Fillauer Company, is now distributing the former Hosmer E2 Electric Elbow. Renamed the Motion E2 Elbow, it is available in four colors and two sizes (Large and Medium). The Motion E2 Elbow is a lightweight electric elbow that can be used with simple switch control, or proportional myoelectric control. It is small enough to be used by adolescents or smaller adults. Forearms can either be prefabricated, or custom fabricated from Fillauer Central Fabrication.

For more information, contact Motion Control at 801.326.3434 or MotionInfo@fillauer.com.

Cascade Dafo's Updated Dafo 5 Offers Improved Fit, Functionality

Cascade Dafo, creators of the original DAFO® (Dynamic Ankle Foot Orthosis), has updated their custom-fabricated, UCBL-style DAFO 5 foot orthosis. Lower dorsal trimlines help the insert fit better in the shoe, and the distal trimlines allow for optimal toe-off.

The new standard toe shelf trimline is more flexible, with the plastic shell trimmed proximal to the 1st met head, and distal to the 5th, transitioning into a dense foam sole. It's also available with a full-length shell trimmed distal to the toes.

The DAFO 5 Softy® features the same trimline options, with a full-length soft foam liner for comfortable control of feet with sensitive boney prominences.

Both styles are excellent solutions for patients who require more control than a shoe insert but don't need the support of an above-ankle orthosis.

For more information, visit cascadedrafo.com/products/dafo-5.

Helping Kids Lead Healthier, Happier Lives®

Endolite Introduces EchelonVAC for exceptional control and comfort.

Optimal socket connection is critical to an amputee's comfort, security and stability. By pairing Biomimetic Hydraulic Technology with an elevated vacuum system, the design of EchelonVAC works to create a secure and comfortable socket connection.

- Biomimetic Hydraulic Technology with integrated elevated vacuum
- No power required, quiet gentle operation
- Lightweight, compact design
- Low Build height
- E-carbon springs for efficient energy return
- Split toe design for ground compliance on uneven terrain
- Weatherproof

When used in conjunction with a Silcare Breathe liner, the vacuum is applied directly to the residual limb to further enhance the connection between the limb and the socket.

For more information contact Endolite at: 800.548.3534 or visit endolite.com

Thuasne USA Now Selling the Eclipse Universal Cervical Collar

Townsend and Quinn Medical are pleased to introduce the Eclipse Universal Cervical Collar. The Eclipse advances the cervical collar with innovative ergonomics, high strength, and superior adjustability. The simple height adjustment allows for easy fitting with fifteen settings for precise positioning. And the unique snap

closure system allows patients to consistently replicate the clinician's initial fit. The products are PDAC approved for L0172 and L0174, and Thuasne USA is the exclusive distributor of the eclipse collar to the O&P industry.

Contact your Thuasne USA representative for a product demonstration. Please visit ThuasneUSA.com for more information on Thuasne USA products and programs.

Endolite Introduces Breathable Liner Technology for Drier Skin and Socket Security

The Silcare Breathe Silicone Liner features laser drilled perforations to allow moisture to escape, resulting in drier skin and a healthier environment for the residual limb. Managing moisture in this way helps to reduce the damaging

effects of friction and improve comfort and control.

- Stretch Zones – seamless technology provides bi-directional stretch to improve comfort and contouring and reduce shear force on the knee as it flexes.
- Laser Perforations – Optimally sized pores, distributed uniformly along the length and distal end of the liner permit the escape of air and moisture.
- Tendresse Finish – A lower coefficient of friction that standard silicone reduces shear stress on the skin.

For more information contact Endolite at: **800.548.3534** or visit www.endolite.com or silcareliners.com

LEAP Balance Brace

Hersco's Lower Extremity Ankle Protection (LEAP) Brace is designed to aid stability and proprioception for patients at risk for trips and falls. The LEAP is a short, semi-rigid AFO that is functionally balanced to support the foot and ankle complex. It is fully lined with a lightweight and cushioning Velcloth interface. Easily secured and removed with 2 Velcro straps and a padded tongue.

Visit Hersco.com for more info or call the lab toll FREE (800) 301 8275. www.hersco.com

Unloader® Knee Braces by Össur – Clinically Proven to Reduce OA Knee Pain

Unloader knee bracing: a proven biomechanical solution for a biomechanical problem. More than 15 clinical studies demonstrate the efficacy of Unloader technology. With medical guidelines requiring conservative treatments prior to surgery, why not try a non-invasive, non-pharmacological, clinically-proven option first?

Building on more than 25 years of experience, Össur has developed an OA knee bracing product line with a variety of both custom and pre-fabricated options, for all activity levels and body types. Össur continues to introduce new technologies that improve comfort and pain relief.

Copper Cloud Diabetic Socks

Apex Foot Health Industries introduces copper cloud diabetic socks. Feature-Rich Socks Marry High-Content Copper with Abundant Protections and Comfort.

Ideal for helping protect against diabetic ulcers, Copper Cloud socks are designed to promote dry, odor-free feet while delivering ultra-comfort. Manufactured from premium-quality yarns containing the highest copper content of any sock on the market, Copper Cloud's anti-fungal and anti-bacterial properties are unmatched. Copper is also

known as a healing-agent that stimulates improved circulation and softer skin.

In addition to its copper benefits, Copper Cloud's features include: a seamless design that curbs ulceration; moisture wicking for drier feet; ventilated airflow for temperature control; non-binding for improved circulation; heel and forefoot padding for added comfort; light arch support to relieve achiness; Y-heel and toe construction for a perfect fit.

Copper Cloud socks are available in four sizes, three styles and two colors (black and white.)

Copper Cloud socks are available at www.apexfoot.com/coppercloud. To order call 800-252-2739.
